

Practice Excellence Partner Proposal Selection

The Home Centered Care Institute is a collaborative nonprofit with a mission to increase access to home-based primary care (HBPC) and to train the current and future workforce to meet clinical and operational standards in the delivery of that care. HCCI has created a nationwide network of Centers of Excellence (COE) for HBPC that will deliver classroom education and is establishing Practice Excellence Partner (PEP) sites, leading house call programs, which will deliver a 2-day field experience, the HCCI House Call Practicum™.

As such, we are looking to partner with a select number of practices whose clinical and practice operations align with HCCI's HBPC curriculum. We invite you to review and consider this exciting opportunity to impact the field of home-based primary care.

If you are interested in learning more and would like to receive the HCCI PEP Agreement Proposal to share with your team, please email [Janet Barron, Manager, Marketing and Digital Communications](mailto:Janet.Barron@HCCI.org) with your request and contact information.
